

TEC-GUARD CHEMICAL

CAMSHAFT AND FOLLOWER LUBRICANT

Product Description

Tec-Guard Chemical Camshaft and Follower Lubricant is designed to be used as a lubricant to apply to potential wear surfaces before assembly in order to prevent metal to metal contact upon startup before adequate lubrication is supplied. Provides three times greater film strength than conventional motor oils and will not clog oil filters. This product clings to all surfaces and is an excellent rust inhibitor, allowing the storage of parts for many months. A thin film of protection is all that is required on mating parts. Camshaft and Follower Lubricant will mix with motor oil and can be used on all lubricated parts such as followers, pistons, bearings, and bolt threads. Use only a small amount on bearing and piston surfaces - too much can make it difficult to turn over the engine. Camshaft and Follower Lubricant is an excellent corrosion inhibitor and can be used on machined surfaces to provide long-term corrosion protection. Do not use on exhaust bolts or other high temperature bolts which require an anti-seize. This product is also an excellent polishing oil for camshafts or crankshafts. plastic and sealed. For incompletely sealed systems periodic endoscope inspection and possible re-application may be required.

Product Advantages

- High viscosity to cling to unassembled parts
- Excellent anti-wear package to prevent excessive wear on startup
- Very low odor provides for good operator acceptance
- Excellent stick-slip lubrication to assure smooth break in
- Designed to be painted on the metallic surface, or whole parts may be dipped if desired

| TYPICAL PHYSICAL PROPERTIES | VALUES |
|---------------------------------|--------------|
| Fluid Type | Straight Oil |
| Appearance | Dark Green |
| Specific Gravity, 60°F (15.6°C) | .920 |
| Viscosity, 100°C | 2000 SUS |
| Viscosity, 40°C | 432 cSt |
| Flash Point, COC | 560°F (293°) |
